## Report to the Governor

“Electronic highways in the 21st century will move information at an unprecedented pace.

... Oregon's changing economy is becoming more information-intensive and our success in the Information Age depends on providing services that allow efficient access to and distribution of information...

## Quotation (continued)

- Rural economic development and educational opportunities will ultimately depend upon the quality of telecommunications systems
- Health care training, diagnosis, and analysis can be delivered and maximized statewide through telecommunications
- Educating our children and (re)training our work force will be enhanced by it

## Quotation (continued)

- Full participation in an international [global] economic community requires a high quality telecommunications system
- Maintaining a quality environment and avoiding congestion depends in part on our ability to substitute information movement for people movement."

## TELECOMMUNICATIONS: OREGON'S NEXT TRAIL

*Some Problems Today, Many  
Prospects Tomorrow*

Report to Governor Roberts  
prepared by  
Task Force on Telecommunications  
April 1991

<http://library.state.or.us/repository/2009/200907281111202/index.pdf>

# Oregon Public Policy

- "...it is the goal of this state to promote access to broadband services for all Oregonians in order to improve the economy in Oregon, improve the quality of life in Oregon communities and reduce the economic gap between Oregon communities that have access to broadband digital applications and services and those that do not..."  
[ORS 759.016(1)]
- "It is the policy of the State of Oregon to promote, facilitate and encourage activities, projects and businesses that improve Oregon's Internet Protocol network infrastructure, performance and connectivity to the Internet backbone network and World Wide Web for the benefit of Oregon's commercial, educational, governmental and individual users." (SJR 19 (2007))

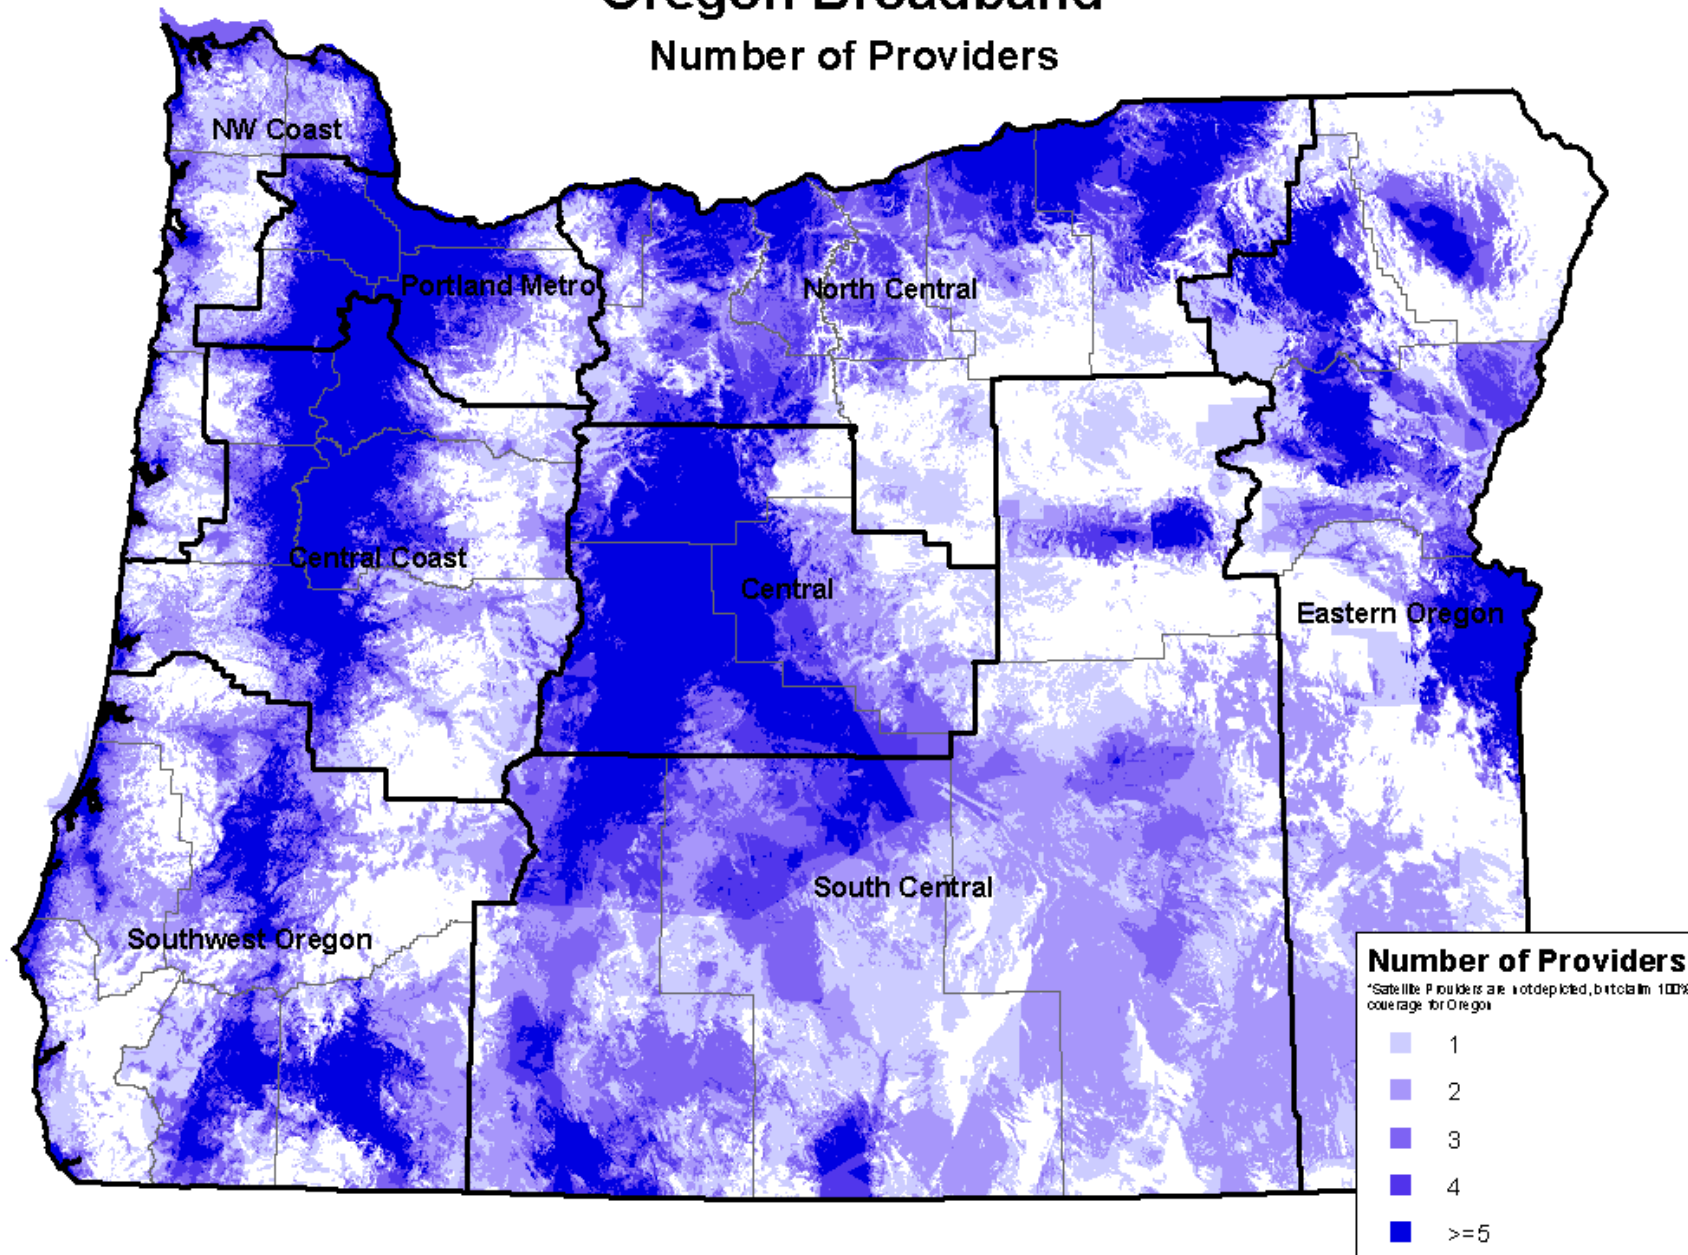

# Oregon Public Policy

- Public Safety: "It is the policy of the State of Oregon to encourage and support the rapid deployment of broadband telecommunications services in areas of the state where such services do not exist, to support redundancy of critical telecommunications assets in order to ensure homeland security protections in the state and to ensure that a secure conduit is available for emergency communications and public safety networks in all Oregon communities." [ORS 401.706]
- It is the policy of the State of Oregon to promote and facilitate activities by Oregon's health care and education communities and their telecommunications providers to develop a network model that provides standards for interoperability, establishes a peering point for all health care and education telecommunications in Oregon and establishes peering agreements among health care and education networks that contain payment structures." (SJR 20 (2007))

### The Oregon Broadband Outreach and Strategic Planning Project

is managed by the Public Utility Commission, Business Oregon and the Broadband Advisory Council to promote broadband strategic planning and accelerate broadband development across Oregon.

The [project](#) is part of the State Broadband Data and Development Program and has been funded through an American Recovery and Reinvestment Act (ARRA) grant administered through the National Telecommunications and Information Administration.

Eight Oregon communities have been selected to develop broadband strategic plans that will support the adoption and utilization of broadband in their respective community.

## OCHIN BROADBAND NETWORK SERVICES

[Home](#)[FCC-Subsidized Programs](#)[OCHIN Medical-Grade Network](#)[Video Conferencing](#)

### OCHIN Medical-Grade Network

A reliable, scalable, and trusted broadband connection is an essential part of the delivery of health IT solutions. The **OCHIN Medical-Grade Network** is a means by which our services and solutions are deployed.

This is a medical-grade, nation-wide network that is a privately managed and monitored, fully provisioned service. It is intended to serve as the bridge between network members (clinicians, patients, administrators, and the network) to a central hosting system for the purpose of providing access to a suite of OCHIN hosted products.

This connection exists *outside of the public internet*, giving you faster, more reliable access.

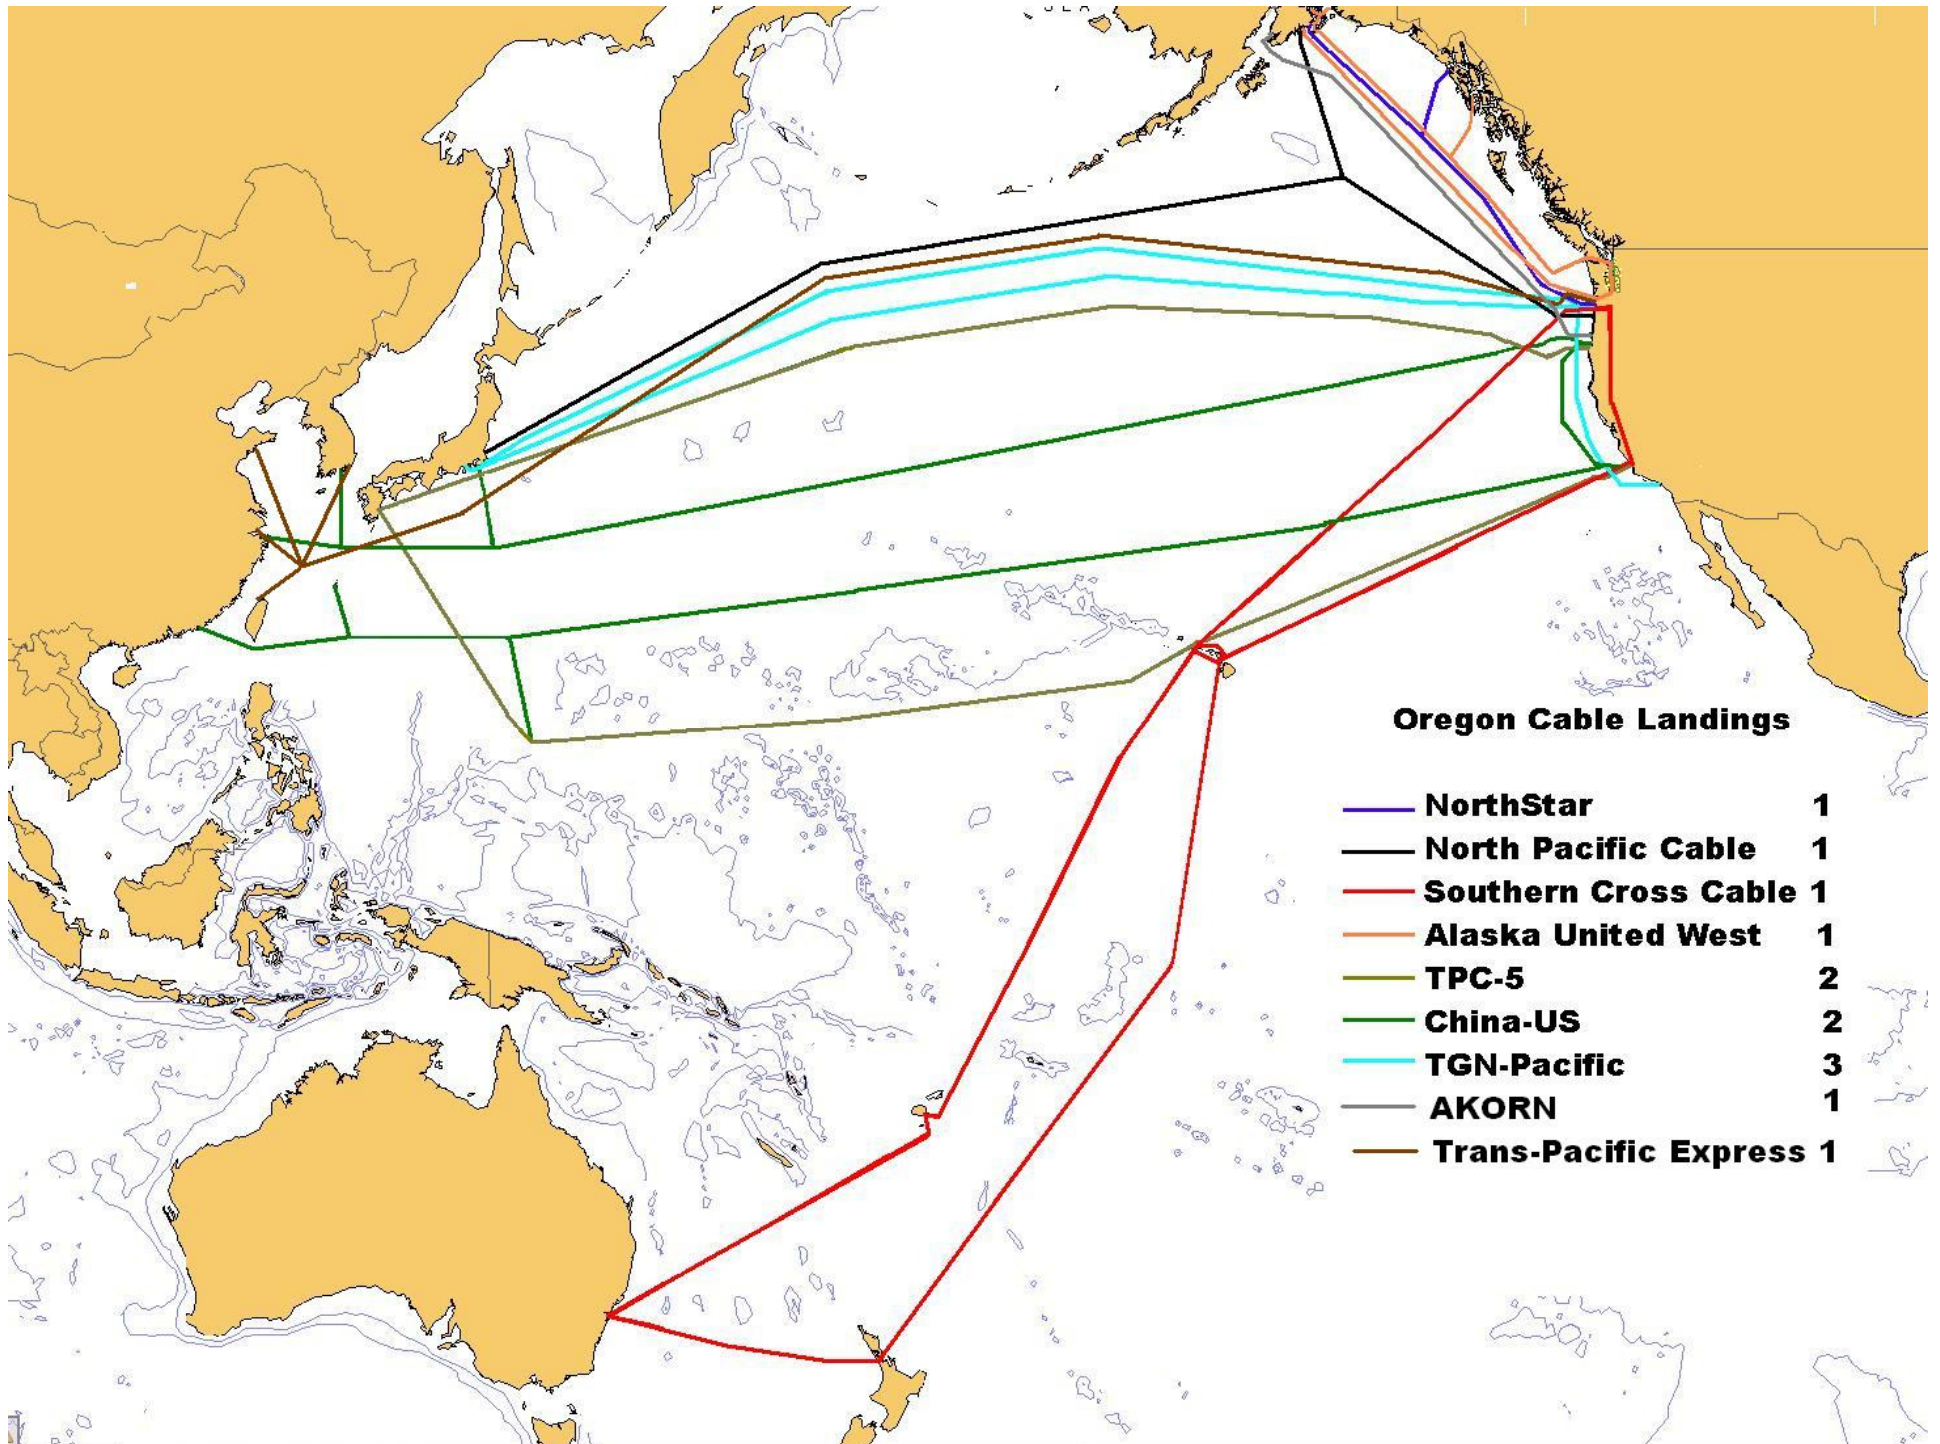

#### The Power of a Network

Being part of our network means joining a community of health care providers and industry leaders committed to integrated, patient-centered care for all.

## 20 Years of Oregon Connections

## Broadband Comes of Age

**THANK YOU TO ALL WHO ATTENDED AND SUPPORTED THIS YEAR'S TWENTIETH OREGON CONNECTIONS TELECOMMUNICATIONS CONFERENCE !!!**

**WE HOPE TO SEE YOU AGAIN NEXT YEAR IN HOOD RIVER,  
OCTOBER 20 AND 21, 2016.**

The **Oregon Connections Telecommunications Conference** draws attendees from all regions of the state to share ideas, experiences and knowledge about telecommunications.

The 2015 conference presenters and attendees explored aspects of Broadband as it comes of age twenty years after the commercialization of the Internet. Program topics will include cyber-security, smart communities, challenge of infrastructure, Internet and Broadband Public Policy, Broadband enabled applications, and the status of Broadband in Oregon.

*"Now this is not the end. It is not even the beginning of the end. But it is, perhaps, the end of the beginning."*  
- Winston Churchill

# A Work in Progress

- Broadband infrastructure will always be a work in progress as technologies and applications change over time.
- What constitutes broadband, e.g., transmission speeds of thousands of bits per second, millions of bits per second, or billions of bits per second will be a moving target.
- The Internet is emerging as **the** global platform for communication, business, government, education, information storage and distribution, and entertainment.
- Competitive high-speed access to the Internet and telecommunications networks is essential for Oregon's institutions, businesses and individual citizens.

# Thank you.
